Col John Boyd's Fast Transits Theory

*Idea of fast transients suggests that, in order to win, we should operate at a **faster tempo or rhythm** than our adversaries—or, better yet, get inside adversary's **observation-orientation-decision-action time cycle or loop***

Course Overview:

Advanced O.O.D.A. Loop based Officer Survival™ training provides up to date, knowledge based, on and off duty, Officer Survival information that is specifically designed to help save officers' lives on a daily basis. This training focuses on understanding, maximizing and properly utilizing the O.O.D.A. Loop on multiple levels and combines officer survival tactics with a performance centered understanding of:

- How the OODA Loop works, both for and against officers.
- How memory is encoded and recalled for maximum benefit.
- How to recognize and decipher danger signs, including previously unrecognized signs.
- How to control stress, fear and anxiety before, during and after dangerous encounters.
- How to maximize your work, training and personal mindset for survival.

Course Goals and Indicators of Success:

- ▶ Officers will understand the realities of officers down in the line of duty.
- ▶ Officers will learn to read and recognize previously unseen/unnoticed danger signs.
- ▶ Officers will gain in depth knowledge about the O.O.D.A. loop, training for proper memory encoding and other factors that play direct roles in officer survival on a daily basis.
- ▶ Officers will have a more tactical mindset, a better understanding of themselves and their adversaries and officers will be able to maximize their performance allowing them greater odds of success.
- ▶ Officers will learn life saving **self-rescue** and **buddy-rescue** tactics and techniques.
